SUMMARY

Computer Science and Data Science student with experience in full-stack development, AI automation, and Python-based data processing. Completed 3 internships delivering impactful solutions such as 40% faster automation pipelines and 30% improved user engagement. Strong skills in React.js, Python, TensorFlow, and backend APIs with a track record of building scalable applications.

EDUCATION

KKR and KSR Institute of Technology and Sciences	2021 - 2025
Bachelor of Technology in Computer Science and Data Science	CGPA: 8.00

SKILLS

Languages	Python, JavaScript, C
Frontend	React.js, HTML5, CSS3, Bootstrap, Responsive Design
Backend & Frameworks	Node.js, Express.js, Flask, RESTful API, TensorFlow, PyTorch, Keras
Database & Tools	MongoDB, MySQL, Firebase, Git, GitHub, Power BI, pandas, NumPy

EXPERIENCE

Front-end Developer Intern	Jul 2024 - May 2025
Innovarsity	Vijayawada

- Created 2 responsive web applications using React.js with custom hooks and Context API, serving 500+ active users
- Increased user engagement by 30% through dynamic content loading and optimized UI/UX design patterns
- Reduced page load times by 20% via code splitting, lazy loading, and efficient state management techniques

Artificial Intelligence Intern	Oct 2023 - Feb 2024
GoPrac	Bangalore

- Engineered AI automation pipeline using Python and TensorFlow, reducing data processing time by 40%
- Implemented prompt engineering techniques across transformer models, improving response accuracy by 35%
- Developed automated error handling systems increasing user satisfaction by 25%

Python Developer Intern	Oct 2022 - Dec 2022
Yhills	Noida

- Engineered scalable Python modules for ML algorithms, accelerating data processing by 25% on 50 GB datasets
- Created automated ETL pipelines using pandas and NumPy, reducing manual preprocessing effort by 40%
- Designed interactive Power BI dashboards presenting KPIs to stakeholders

PROJECTS

Secure Access - Multi-Factor Authentication System github.com/srinivaspavan73/secure-access

- Designed triple-layer authentication system with 90% accuracy using facial recognition and gesture verification
- Achieved real-time processing at 24 FPS with 95% gesture recognition accuracy using CNN architecture
- Integrated Flask API backend and React.js dashboard for real-time performance tracking and user authentication
- Tech stack: Python, TensorFlow, OpenCV, Flask, React.js

CampusHub - Campus Management Platform github.com/srinivaspavan73/campushub

- Architected full-stack platform with role-based access control and JWT authentication
- Created RESTful API handling CRUD operations for campus events, placements, and user management
- Implemented scalable MongoDB database schema and deployed frontend on Vercel with backend on Render
- Tech stack: MERN (MongoDB, Express.js, React.js, Node.js), JWT, Vercel, Render

ACHIEVEMENTS

- Secured 5th place among 50+ teams in college hackathon for marketplace platform with strong community features
- Ranked top 25 among 500+ participants in nationwide Algorand blockchain hackathon
- Published 2 patent applications for authentication systems and transaction performance innovations

LEADERSHIP & EXTRACURRICULAR

- **Student Lead, Innovation Club:** Organized 10+ technical events engaging 300+ participants
- **Mentor, Jevan Kaushal Club:** Led workshops on communication and leadership for 50+ students
- **Head Coordinator, Avishkar Club:** Managed 20+ member team, won Best Coordinator Award
